

M CELL[®] SEWING THREAD

M CELL[®] Sewing Thread, is made from TENCEL[®] fiber by Lenzing. TENCEL[®] fiber is man-made fiber made from sustainable forests and its production process has a lower environmental impact.

Ecological Production

Closed-loop process- more than 99% of solvent is recovered and reused

A Life Cycle Analysis by Lenzing Fibers demonstrates the eco-friendliness of TENCEL[®] fiber in comparison to cotton, polyester and polypropylene

Botanic Sewing Thread - from Wood to Thread

MCELL[®] is reliable sewing performance in high speed machines same as Cotton or Polyester Thread. Achieved superior sewing performance from special spinning process as well as special fiber made by Lenzing technology

TENCEL[®] is a registered trademark of Lenzing Aktiengesellschaft for lyocell fibers.
